

Hanomy Manifesto @Hanomy.com

A WORLDWIDE Paradigm Shift to HARMONIZE Living for ALL

In the last 6,000 years civilizations have come and gone. Every one of them collapsed sharing similar characteristics: over consumption, high debts, wealth inequality, and xenophobia. Our civilization is now facing the same fate as those before us, mainly brought on by a failing and fraudulent financial system. Because of the tight integration in the worldwide banking network, the impact of this fiasco reaches across the world instead of a specific geographical area. Without a new way of living and focusing on humanity as the highest priority, major conflicts will emerge as it did throughout our history.

Since rules, regulations, and laws are made by humans and forever evolving with time and the environment; they should be altered to better serve humanity when old ways are found to be working against us. First, we must understand what has gotten us to this point and where we are heading so we won't repeat the mistakes of the past.

The Hanomy Manifesto explains our world as it stands and makes a case for a new comprehensive system that will allow humanity to live life to its fullest, bypassing the hardships imposed on humanity as a result from obsolete policies and other mechanisms. What will all of humanity's progress serve if only a handful of people enjoy the benefits the world now has to offer? While the majority of the population increasingly struggles to survive, they waste their most valuable commodity – TIME. Something is terribly wrong when the average CEO-to-worker pay ratio is now 339 to 1 and the top 1% (worldwide) hold more financial wealth than 99% of the world's population. In 2016, only 62 individuals held more wealth than the bottom half of all the world's population combined (3.7 billion people). In 2018, that number has consolidated to 42 individuals.

Our current financial system is based on "money as debt" and credit expansion. The power to create money is concentrated in only a few hands. Laws and rules are being imposed unfairly which, over time, creates significant disparity through colossal income gaps and wealth inequality while diminishing freedom and opportunity among the masses. It also creates recurring economic boom & burst cycles through the manipulation of money supply and interest rates, resulting in wealth consolidation towards the top. Purchasing power is lost through perpetual inflation - a direct result of printing money to service debts. So long as this is the practice, fully repaying interest on existing debts is IMPOSSIBLE.

Many great minds and skill sets will not flourish as long as **survival** holds a higher priority. In general, disparity and hardship are not caused by lack of resources or knowhow; but by the limits set on distribution efficiency and accessibility. Humanity has progressed and now possesses knowledge to free us all of this survival mentality and its slavery-like conditions. We can begin living a more fulfilling life, using our precious time to enrich it and the lives of others. But first, a better foundation that truly serves all humanity must be in place especially now that artificial intelligence (AI) and automation (growing at 14% per year) are encroaching on available jobs. ...Now it's time to have a serious discussion of such an alternative.

Hanomy is a calculated strategy, if not solution, to our exploited social, financial, and political systems currently driven by greed and power. It provides a thorough walk-thru of all its components including finance, government, advanced technology, ancient knowledge, spirituality and other elements relevant to every one of us. Although some elements in Hanomy have been discussed, tested and practiced in various parts of the world,

these components (independently) find difficulty working within our existing framework. Implementing anything less than all that Hanomy accounts for would fall short of what humanity deserves. **Hanomy is not a quick band aid solution. It's a major worldwide paradigm shift** from life of past millenniums. **Nor is Hanomy a utopian system. It's essentially the missing link in between.** It creates conditions for each human to live life according to their own view without being bound by obsolete and bias limitations. Such a paradigm shift is now possible thanks to humanity's accrued knowledge and progress in all fields. In time, financial greed and the power controlling humanity will subside as people's voices are heard directly and their will is carried forward.

Hanomy is to provide humanity with the basic human needs to sustain life – while basic human rights are observed – freeing us to experience life and contribute to society with true interest and passion. Further, it ushers in long lasting peace, prosperity, stability, sustainability, and harmony throughout the world. Together, we can start a new chapter in human history HERE and NOW!

Humanity can be free from all shackles - socially, financially, politically, physically, mentally, and spiritually. Freedom of expression will be embraced and protected. Sovereign debts worldwide will be settled fairly - without lowering the living standard in countries with high debt per capita while elevating living standards and providing fresh opportunity for countries with lower debt per capita. Interest charges, usury practice, and the fractional reserve system are all abolished - dissolving inflation so one can plan their future accordingly. No more will there be taxes on income, profit, or spending. *"Money is a medium of exchange, a measure of value, or a means of payment"* (by definition), NOT a vehicle for wealth accumulation. Money, in itself, doesn't have any inherent value. It should be utilized by those who can AND are willing to seek its productive use, or to benefit others in need. In Hanomy, part of each country's government revenue is derived from a portion of idle/stagnant money beyond what is considered socially-acceptable (on currency only and less than the current average tax rate in most countries). With the right methods and deployment, a country and its citizens can maintain and expand wealth while furthering humanity's progress. **All can benefit regardless of financial status.**

After exploring and understanding the principles of Hanomy, many things fall into place. True capitalism with greater responsibility will take root. Respect and gratitude towards others will flourish. Working conditions will improve greatly. Crime rate as well as social problems that stem from financial inequality will cease to exist. Immigration concerns will diminish. People will no longer work just to have a job, but to do a job they are passionate about so they can contribute their best. Technology advancement and knowledge in all fields; especially in food production, healthcare, communication & transportation, resource deployment, and automation - will improve even at faster rates. Taking care of older loved ones or raising children will no longer be a burden but rather an affectionate human experience. Charity and volunteering become an abundant practice. Suppressed ancient as well as current knowledge and science will emerge as transparency surges. Our precious environment will be taken better care of as patriotism is a driven force. Community will be strengthened through shared culture and objectives. The ultimate results: spiritual enlightenment, happiness, and love will spread throughout the world.

The time is NOW for an alternative to our impending realities. A path towards the next golden age for humanity is here. This change can become a reality with your help. We can all take part in this historical event together and claim it as one of our generation's best achievements...one we're proud to claim and pass along.

"The test of our progress is not whether we add more to the abundance of those who have much; it is whether we provide enough for those who have too little." (Franklin D. Roosevelt, the 32nd President of the United States)
